

Boval can meet your custom sheetmetal fabrication needs

From laser cutting and metal finishing to custom made products,
Boval have it covered!

We have just purchased a new 3 Kilowatt Fiber Laser!

It is a 3kW IPG YLS Fiber laser source, 3000 x 1500mm cutting range, Siemens 840D CNC control system, Precitec cutting head, with a pallet changer.

The cutting capacity is 20mm Mild Steel, 12mm Stainless Steel, 12mm Aluminium, 8mm Brass, and 6mm Copper. It will be installed in the next four weeks.

As well as retaining our existing Laser, this along with our new press brake will assure that we can improve our on time deliveries.

We are also planning to expand our sales team to ensure that any enquiries can be dealt with quickly and more efficiently.

About Boval Engineering

Boval Engineering, the precision sheetmetal fabrication experts, specialise in the design, development and fabrication of custom made precision sheetmetal products.

Boval Engineering is committed to its customers with a proven track record in precision sheetmetal fabrication and manufacturing, with leading edge technology.

Boval Engineering has built its reputation on quality, service, and total customer satisfaction.
